## CAREER SUMMARY

Engineering graduate from SDM Institute of Technology with a solid foundation in software development, web technologies, and artificial intelligence. Proficient in Python, Java, React.js, SQL, and modern development tools, with practical experience gained through an internship at Mind Matrix, where I worked with Zen-AI and contributed to software development and application design. Built multiple academic and personal projects, including AI-powered web and mobile applications, strengthening my skills in problem-solving, API integration, and full-stack development. Eager to apply technical expertise, learn emerging technologies, and build reliable, scalable applications as part of a collaborative software engineering team.

## EDUCATION

|                                                                                                                                                                   |                 |

| Vikasa High School<br>10th                                                                                                                                        | 1/2019 – 6/2020 |
| Vikasa PU College<br>12th/PUC                                                                                                                                     | 4/2022 – 3/2022 |

## TECHNICAL SKILLS

Programming Tools — Java | Kotlin | SQL | Python | React.js | Node.js | HTML | CSS | JavaScript

Soft Skills — Teamwork | Communication | Problem-Solving | Adaptability

Others — UI/UX basics | Productivity tools | Android Studio

## PROJECTS

### AI-Powered Student Hub for Skill Sharing:

- Developed a AI-Powered Student Hub platform for skill sharing, enabling students to connect, learn, and share knowledge across various fields such as technology, design, and personal development.

### Student Library Management System :

- Developed a Student Library Management System to manage book records, issue/return transactions, and student details efficiently.

### Namma Santhe Ledger App (Finance) :

- Developed a mobile finance management application for small business and shop owners to manage customer credit, payment transactions, daily ledger records, and expense tracking efficiently.

## CERTIFICATIONS
